Why Cloud365?

Your applications, wherever and however you want them.

Deploy your applications on the infrastructure that suits you best, whether it's in the cloud, colocation facilities, or through Hardware-as-a-Service.

Choose from a wide range of global locations to ensure optimal performance. You have the option to manage the project and infrastructure yourself or rely on our Managed Services to handle everything for you.

Global connectivity with full visibility and SLA support.

Achieve seamless networking and connectivity across your users, data centers, and cloud services worldwide. Trust Cloud365 to manage your network while providing you with real-time visibility through our Customer Portal. And if you require Voice Communication solutions, we have you covered too. Rest easy knowing that your communication needs are taken care of, ensuring a good night's sleep.

A trusted partner with over 12 years of experience and a knowledgeable team.

Quality, agility, availability, satisfied users, and peace of mind. With Cloud365, you have a single point of contact for sales, provisioning management, support, and administration. We guarantee the expertise gained from our experience in Cloud & Voice/Data Networking Services, the capabilities of our skilled professionals, and the credentials of our trusted business partners.
