You've already invested in Nutanix.
Are you getting the full value from the platform?

Cloud365 helps you optimize, protect, evolve and operate your Nutanix environment.

Health Check

Your starting point
Understand what you have, what you use and where the risks are

Start with an essential assessment and evolve to a complete analysis, including an improvement roadmap.

Managed Operations

More control, less workload for your team.

Proactive monitoring, capacity management, patches, upgrades and escalation management.

Workload Security

Reduce exposure and limit the spread of incidents.

Flow mapping, microsegmentation and enhanced security, helping support NIS2 requirements.

We also support:

- Automation to operate faster
- Hybrid cloud for greater flexibility
- Backup to protect your data

VMware Migration

Move beyond VMware with controlled risk.

Assessment, phased migration plan, testing and support throughout the transition to Nutanix AHV.

Resilience and Recovery

Recover what matters when you need it.

DR design, configuration and testing, including RTO/RPO and runbooks.

Cloud365, in the market since 2011 | Nutanix Partner | Ranked among the Top 5% Best SMEs in Portugal 2025
Our team is led by a Technical Director with extensive experience implementing, optimizing and operating large-scale, complex Nutanix environments, including migrations from VMware.

CLOUD365 NUTANIX

Nutanix Environment Health Check

Assessed areas and customer benefits

Area	What We Assess	Customer Benefit
Licensing and Usage	Licensed features vs. actual usage	Get more value from your existing investment
Protection and Recovery	Replication, RTO/RPO and DR testing	Confidence that you can recover when needed
Capacity and Performance	Usage, growth and available headroom	Plan expansion without surprises
Configuration and Stability	Versions, best practices and alerts	Lower risk of incidents and upgrade failures
Security	Access, security hardening and segmentation	Reduced exposure to threats
Operations and Lifecycle	Patches, upgrades, processes and team	Less workload and greater predictability

Areas shown in blue are included in the essential Health Check. The complete Health Check covers all six areas and includes an executive report and roadmap.
